Volume 1 Issue 4

What's the Deal?

This and that, here and there!

Hello Fantastic I-I Key Clubber!!

I hope everyone is having a more than amazing summer! I know that during the summer months, it is very hard to stay active and interested in Key Club, but I know everyone will do their best!

Remember that the next report is not due until September 10th. This report will cover the months of June, July, and August! This report will be done on the new report form!! Don't be scared at all...they are very easy changes, and I have the utmost confidence in everyone!!

With the new report form, we must have a new grade sheet! Although not all of the new sections will be graded initially, I would like to work them in periodically. The new grade sheet will be posted on www.ikeyclub.org in the "Statistical Secretary" Executive Officer page. Make sure to take a look at the new report form, if you haven't already...that way everyone can do a **phenomenal** job on the September report!

Yours in Service,
Alex Deal

report is next
one due!!

UPCOMING EVENTS!

September 10th report due; covers them months of June, July, and August!

ELIMINATE

Kiwanis eliminating maternal/neonatal tetanus

Kiwanis

With The ELIMINATE Project, Kiwanis International and UNICEF have joined forces to eliminate maternal and neonatal tetanus. This deadly disease steals the lives of 60,000 innocent babies and 30,000 mothers each year. The effects of the disease are excruciating, tiny newborns suffer repeated, painful convulsions and extreme sensitivity to light and touch.

To eliminate MNT from the Earth by 2015, 129 million mothers and their future babies must be immunized.

This requires vaccines, syringes, safe storage, transportation, thousands of skilled staff and more. It will take \$110 million — and the dedicated work of UNICEF and every member of the Kiwanis family.

Kiwanis and UNICEF joined forces to tackle iodine deficiency disorders, achieving one of the most significant public health successes of the 20th century. Now, they are eliminating MNT from the face of the Earth. And in doing so, the project will reach the poorest, most neglected mothers and babies with additional lifesaving health care. The end of this one disease means the beginning of better health for so many families.
